

After consultation with medical and public health experts, effective Monday, April 26, 2021, the District's COVID-19 quarantine protocols for individuals identified as "close contacts" will be updated as follows:

10-day Quarantine Guidelines

- The current 14-day quarantine period will be shortened to 10 days.
- Asymptomatic individuals may end their quarantine after 10 days, without testing and return to the school/worksite.
- Quarantined individuals must continue to monitor their symptoms until 14 days after exposure.
- If an individual develops symptoms, they must immediately self-isolate and contact their healthcare provider.
- During the 10-day quarantine and after they return to school/worksite, individuals should continue to follow all COVID-19 precautions such as wearing a mask, maintaining social distancing, washing their hands and avoiding crowds.

Quarantine Guidelines for Fully Vaccinated Individuals

Fully vaccinated students and employees will not need to quarantine and may remain at school/worksite providing they meet ALL the following CDC criteria:

- Two weeks have passed since:
 - 1) receiving a single dose vaccine, or
 - 2) the second dose in a two-dose series.
- They remain asymptomatic after the current COVID-19 exposure.
- They do not reside in a group home.

If a fully vaccinated individual does not meet ALL the above criteria, the 10-day quarantine protocol will be followed.
